**DETAILED ACTION**

**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Nathan Weber on 9/15/2007.

The application has been amended as follows:

The application has been amended as per attached Appendix.

***Allowable Subject Matter***

2. Claims 1-3 and 5-10 are allowed.

***Reason for Allowance***

3. The following is an examiner's statement of reasons for allowance:

Applicant's argument (see page 7 of the remark section filed on 8/17/2007) regarding 35 USC 112 rejections of claims 1, 4, 5 and 9 have been fully considered and are persuasive. As such, Examiner has withdrawn the 35 USC 112 rejections to claims 1, 5 and 9. Applicant has cancelled claim 4.

Art Unit: 2619

The prior art of record does not teach the following:

In regards to claims 1 and 9 the prior art does not teach a transmission unit for producing topology information, squelch information and switching information concerning each of plurality of networks on the basis of ring configuration information for each of the corresponding networks, and transmitting topology information, squelch information and switching information via output units and a switching unit for performing processing including switching operations and bridging operations on the basis of switching information.

In regards to claim 5 the prior art does not teach a control unit transmitting switching information only via the higher speed transmission lines and at least one higher speed input unit when trouble has occurred in higher speed transmission lines shared by plurality of networks; a detection unit for detecting trouble in first transmission lines; and a judgment unit for judging whether or not switching information is to be transmitted by transmission unit to all of the networks to which shared transmission line is connected, or to one of the networks among networks when detection unit detects trouble in shared transmission line.

The prior art alone or in combination fails to jointly suggest or teach the claimed combination of features as taught by the instant application. Therefore claims 1-3 and 5-10 are to be deemed allowable over prior art.
